Summerlin South, NV

Career Objective

Proven full stack software engineer with strong reasoning, problem solving, and interpersonal skills. Looking to share my experience & motivation with an agile team that's laser-focused on innovating products that provide a unique value proposition and experience to the user.

Professional Experience

Frontend Software Engineer

Conduit Health

New York, NY (Jul '23 - Present)

A marketplace for suppliers to order home medical equipment for their patients.

- Transformed a MVP into a MMP, delivering 8000+ orders to patients year 1
- Improved release process with E2E infrastructure and 95%+ test coverage
- Mentored 2 junior intern engineers on frontend and testing techniques

Full Stack Software Engineer

Crystal Bay Software

San Francisco, CA (Feb '20 - Jun '23)

An EMR for mental health clinicians and staff to administer patient records.

A private portal for patients to schedule appointments and make billing payments.

- Created new Reports System for users to export EMR data, 35+ reports
- Improved system reliability with over 800+ unit and integration tests
- Extended the expected product EOL date by 3 years

Full Stack Software Engineer

Delmondo, Conviva

New York City, NY (Dec '16 - Jan '20)

A platform for brands to aggregate social media campaign analytics.

- Implemented 20+ charts plotting common and custom key metrics
- Added 15+ new views for brands to digest their data
- We gained the business & trust of major brands such as Nike, CNN, Fox & NFL

Business Systems Engineer

MediaTemple, GoDaddy

Los Angeles, CA (Jan '13 - Jul '16)

An internal business intelligence & workflow management application.

- Empowered 80+ tech support agents with insights into their performance
- Empowered managers and team leads to make team decisions from data
- Bridged 2 internal & 1 external system to streamline agent screens from 4 to 2
